MICHEAL AUGUSTIN J

Game Developer | Unity Developer | AR/VR | Game QA Tester

Tamil Nadu, India | +91 9659626548 | michealaugustin0000@gmail.com

linkedin.com/in/michealaugustin | github.com/MichealAugustinGamedev

PROFESSIONAL SUMMARY

Entry-level Game Developer with hands-on Unity (C#) experience and a 4-month AR/VR internship building real-time applications in Unity and Unreal Engine. Strong in gameplay programming, game logic, debugging, and performance optimization, with a testing mindset applied to every build. Seeking Junior Game Developer, Unity Developer, or Game QA Tester roles.

SKILLS

Game Development: Unity, C#, Unreal Engine, Gameplay Programming, Game Logic, 2D & 3D Games, UI Design, Physics

AR/VR: AR/VR Application Development, Vuforia, XR Interaction Toolkit, 3D Asset Integration

Programming: C#, C++, Object-Oriented Programming (OOP)

Game Testing & QA: Manual Testing, Gameplay Testing, Bug Identification & Reporting, Debugging, Performance Optimization

Tools: Unity Editor, Unreal Engine, Visual Studio, Git, GitHub, Blender (Basics)

PROFESSIONAL EXPERIENCE

AR/VR Intern | IQ TechMax Private Limited, Chennai, India Dec 2025 – Mar 2026

- Assisted in developing immersive AR/VR applications in Unity and Unreal Engine as part of a cross-functional team.
- Integrated 3D assets and set up scenes and interaction design for real-time applications.
- Implemented gameplay logic and user interactions in C# to build interactive environments.
- Tested and debugged builds and optimized performance to keep applications running smoothly.
- Collaborated with designers and developers throughout AR/VR project development.

PROJECTS

AR Overlay Application | Unity, C#, Vuforia

- Built an AR application that overlays 3D models onto real-world objects using Vuforia Model Target detection.
- Designed a guided user workflow (Scan, Adjust, Retry, Checklist Verification) with interactive scenes and integrated 3D assets.
- Tested on iPad, debugging and optimizing to improve performance and application stability.

Mobile Tower VR Simulator | Unity, C#, XR Interaction Toolkit

- Developed a VR simulator for interactive visualization and training on mobile tower structures.
- Implemented 3D models, real-time interactions, and user navigation within an immersive virtual environment.
- Worked with team members to improve simulation accuracy and user experience; tested, debugged, and optimized for stability.

2D & 3D Chess Game | Unity, C#

- Developed a chess game with both 2D and 3D modes and interactive gameplay.
- Programmed core game logic, including piece movement, rules validation, and turn-based system.
- Designed the user interface; tested, debugged, and optimized for smooth gameplay.

Additional Unity 2D Projects | Unity, C#

- Built Mario-style platformer, Flappy Bird, and Dino endless-runner clones to practice player movement, physics, obstacle spawning, and game-state logic (source on GitHub).

EDUCATION

Master of Computer Application (MCA) June 2024 – April 2026

St. Joseph's College (Autonomous), Tiruchirappalli, India

Bachelor of Computer Science Aug 2021 – Apr 2024

St. Joseph's College (Autonomous), Tiruchirappalli, India

CERTIFICATIONS

Game Tester Certification (Udemy) | Google IT Support Professional Certificate (Google)
