MICHEAL AUGUSTIN J

Game Developer | Unity Developer | AR/VR | Game QA Tester
Tamil Nadu, India | +91 9659626548 | michealaugustin0000@gmail.com
Portfolio: michealaugustin.github.io/portfolio | linkedin.com/in/michealaugustin | github.com/MichealAugustin

PROFESSIONAL SUMMARY

Entry-level Game Developer and Game QA Tester with hands-on Unity (C#) experience and a 4-month AR/VR internship building real-time applications in Unity and Unreal Engine. Strong in gameplay programming, game design principles, debugging, and performance profiling and optimization, with a testing mindset applied to every build. Experienced with Git/GitHub version control and cross-platform builds. Seeking Junior Game Developer, Unity Developer, or Game QA Tester roles.

SKILLS

Game Development: Unity, C#, Unreal Engine, Gameplay Programming, Game Logic, Game Design Principles, 2D & 3D Games, UI Design, Physics
AR/VR: AR/VR Application Development, Vuforia, XR Interaction Toolkit, 3D Asset Integration
Programming: C#, C++, Object-Oriented Programming (OOP)
Game Testing & QA: Manual Testing, Gameplay Testing, Bug Identification & Reporting, Debugging, Performance Profiling, Performance Optimization
Version Control: Git, GitHub
Cross-Platform Development: Mobile (iPad), VR, and Desktop Builds
Tools: Unity Editor, Unreal Engine, Visual Studio, Git, GitHub, Blender (Basics)

PROFESSIONAL EXPERIENCE

AR/VR Intern
Dec 2025 — Mar 2026
IQ TechMax Private Limited · Chennai, India

- Assisted in developing immersive AR/VR applications in Unity and Unreal Engine as part of a cross-functional team.
- Integrated 3D assets and set up scenes and interaction design for real-time applications.
- Implemented gameplay logic and user interactions in C# to build interactive environments.
- Tested and debugged builds, profiled performance, and optimized applications to keep them running smoothly.
- Collaborated with designers and developers using Git/GitHub version control throughout AR/VR project development.

PROJECTS

AR Overlay Application | Unity, C#, Vuforia

- Built an AR application that overlays 3D models onto real-world objects using Vuforia Model Target detection.
- Designed a guided user workflow (Scan, Adjust, Retry, Checklist Verification) with interactive scenes and integrated 3D assets.
- Tested on iPad, debugging, profiling, and optimizing to improve performance and application stability.

Mobile Tower VR Simulator | Unity, C#, XR Interaction Toolkit

- Developed a VR simulator for interactive visualization and training on mobile tower structures.
- Implemented 3D models, real-time interactions, and user navigation within an immersive virtual environment.
- Worked with team members to improve simulation accuracy and user experience; tested, debugged, and optimized for stability.

2D & 3D Chess Game | Unity, C#

- Developed a chess game with both 2D and 3D modes and interactive gameplay.
- Programmed core game logic, including piece movement, rules validation, and turn-based system.
- Applied game design principles to UI and player feedback; tested, debugged, and optimized for smooth gameplay.

Additional Unity 2D Projects | Unity, C#, GitHub

- Built Mario-style platformer, Flappy Bird, and Dino endless-runner clones to practice player movement, physics, obstacle spawning, and game-state logic (source on GitHub).

EDUCATION

Master of Computer Application (MCA) June 2024 – April 2026
St. Joseph's College (Autonomous), Tiruchirappalli, India
Bachelor of Computer Science Aug 2021 – Apr 2024
St. Joseph's College (Autonomous), Tiruchirappalli, India

CERTIFICATIONS

Game Tester Certification (Udemy) | Google IT Support Professional Certificate (Google)
